The demographic changes are also expected to have a significant impact on the world's health care system. The number of people in the world is expected to increase from 5.3 billion in 1990 to 6.5 billion in 2025.

the 1990s, the number of people in the world who are illiterate has increased from 1.1 billion to 1.5 billion.

There are many reasons for this. One is that the population of the world is growing so fast that the number of people who are illiterate is increasing even though the percentage of illiterate people is decreasing.

Another reason is that the quality of education is poor in many countries. Many children do not go to school, and those who do often do not learn to read and write.

There are also many people who are illiterate because they are poor and cannot afford to go to school. In many countries, education is free, but the cost of books and other materials is too high for many people.

There are also many people who are illiterate because they are in remote areas where there are no schools. In these areas, people often have to travel long distances to get to school.

There are also many people who are illiterate because they are disabled. In many countries, there are no schools for disabled children, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are ill. In many countries, there are no schools for sick children, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in prison. In many countries, there are no schools for prisoners, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the military. In many countries, there are no schools for soldiers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the police force. In many countries, there are no schools for police officers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the government service. In many countries, there are no schools for government employees, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the private sector. In many countries, there are no schools for private sector employees, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the informal sector. In many countries, there are no schools for informal sector workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the agricultural sector. In many countries, there are no schools for agricultural workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the industrial sector. In many countries, there are no schools for industrial workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the service sector. In many countries, there are no schools for service workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the health sector. In many countries, there are no schools for health workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the education sector. In many countries, there are no schools for education workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the media sector. In many countries, there are no schools for media workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the entertainment sector. In many countries, there are no schools for entertainment workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the sports sector. In many countries, there are no schools for sports workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the arts sector. In many countries, there are no schools for arts workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the science sector. In many countries, there are no schools for science workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the technology sector. In many countries, there are no schools for technology workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the business sector. In many countries, there are no schools for business workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the finance sector. In many countries, there are no schools for finance workers, and those who do go to school often do not learn to read and write.

There are also many people who are illiterate because they are in the legal sector. In many countries, there are no schools for legal workers, and those who do go to school often do not learn to read and write.
