

# Division

## Worksheet - 4

**GREAT THINGS ARE DONE BY A SERIES OF SMALL THINGS  
BROUGHT TOGETHER.**

1 2 3 4

1. In a car parking, there were 100 vehicles, all were cars and motorcycles. If the total number of wheels were 250, how many cars were there?

- A. 35                                      B. 25                                      C. 75                                      D. 62
- 

2. To get a quotient of 50, what number should be divided by 19?

- A. 900                                      B. 950                                      C. 1360                                      D. 1900
- 

3. What is the number that replaces the question mark in the box?

$$\boxed{84 \text{ R } 3 = ? \div 5}$$

- A. 428                                      B. 432                                      C. 423                                      D. 484
- 

4. If  $P + Q = 105$  and  $P - Q = 45$ , what is  $(P \times Q) \div (P \div Q)$ ?

- A. 2450                                      B. 5625                                      C. 2250                                      D. 900
- 

5. If the value of Q is twice the value of R, find R.

$$\boxed{56} \xrightarrow{\div P} \boxed{Q} \xrightarrow{\div Q} \boxed{R}$$

- A. 56                                      B. 2                                      C. 1                                      D. 28
- 

6. When a number is increased by 8, it is divisible by 35. What is the remainder when the same number is divided by 5?

- A. 2                                      B. 4                                      C. 3                                      D. 0
- 

7. When a number X is added to 8, the sum is divisible by 14, What could the number X be?

- A. 48                                      B. 58                                      C. 78                                      D. 68
- 

8. 2961 sweets were given to the children in an orphanage, Each child received 3 sweets. How many children were there?

- A. 8883                                      B. 987                                      C. 2964                                      D. 2958
- 

9. Which number should come in place of \* in  $1526*85$  to make the number divisible by 3?

- A. 5                                      B. 0                                      C. 2                                      D. 1
-

10. Three shirts and 7 pairs of pants have a total of 55 buttons. Each pair of pants has 5 fewer buttons than each shirt. How many buttons are there on each shirt?

A. 4

B. 9

C. 25

D. 30
